ASSIGNMENT 1

Info 5100, Fall 2024

Prof Bugrara

Due Date: 19 September 2024 (11:59 PM)

The objective of this assignment is to get you familiar with java classes, objects, swing framework classes and event (button clicks) processing. In addition, you will learn how to move data in and out between objects and java swing forms.

You are to build a Swing application in Netbeans IDE that will provide the following features/actions in the form of objects with their associated attributes. You are to write an application similar to the product app we discussed in class. Your app will include a jframe, as well as two jpanels for creating person profile, and view person profile respectively.

Your Person profile must include the following 14 attributes. Additionally, you should add six more attributes of your own choice.

First Name
Last Name
Email
Phone
Drivers License Number
Drivers License State
Social Security Number

Address Line 1
Address Line 2
City
State
ZIP
Telephone Number
Fax Number

Submission Information:

1. Inside your **assignments** repository, create a separate folder for this assignment.

2. Put the project into that separate folder you just created.

3. Make appropriate commits and push changes to GitHub before the deadline.

4. On Canvas, you must upload a screenshot of your GitHub Assignment repository showing the file/folders you pushed to the repository.

PLAGIARISM

When there is evidence that a student has committed plagiarism, copied the work of others, allowed others to copy their work, cheated on an exam, altered class material or scores, or has inappropriate possession of exams, or sensitive material, the incident will be investigated. The consequences for academic dishonesty are severe and that will include a straight **F** in the course with the potential for dismissal.
